

Core Capabilities

We are a strategic government and commercial, electrical and security contractor prepared to execute the foundational infrastructure of information technology and system security; electrical connectivity and capacity; as well as innovative communication and security technology design. We are a women and minority owned small business focused on providing exceptional service and results.

We will ensure that our clients' network and physical properties have controlled access, contain risk management solutions and provided the highest quality support and service.

SUMMARY

Our consultants have more than 30 years of experience working in the information technology, information management, electrical and security solutions industries. Our consultants have completed more than thirty-five government and hundreds of private sector projects of various size, scope and implementation as both the prime and sub-contractor. The successful performance of the company is built upon three foundational corporate characteristics: Diligence, Flexibility & Process. Each team member brings this approach to each project enabling a thorough understanding of our clients' needs.

SOLUTIONS

Design/build

Our consultants are experienced in designing information security systems with the ability to enhance existing infrastructures with the latest technologies. Our information security services include, but are not limited to:

Risk Assessment

Information Security Architecture & Engineering

Information Assurance

Network Engineer

Training

Vulnerability Scanning and Analysis

Help Desk/Support

Network Security Design

Facility Management

Access Control Credentialing

"Providing next level solutions for building automation, network integration and access management."

Support Services

Our company provides custom designed solutions for each client engagement. Our technology, security and power infrastructure system solutions may include the following implementation options:

<i>Full Electrical Construction</i>	<i>Emergency Management</i>
<i>Virtual Private Networking</i>	<i>Web Proxy/Content Filtering</i>
<i>LAN/WAN Network Design and Administration</i>	<i>Network/Data Protection</i>
<i>Microsoft Windows System Administration</i>	<i>Fire Systems</i>
<i>Electronic Security Intrusion Detection</i>	<i>Heavy UPS</i>
<i>Area of Refuge Notification Systems</i>	<i>Structured Cabling/Network Cabling</i>
<i>Replacement/Upgrading Electrical Wiring</i>	<i>Emergency Call</i>
<i>Access Control</i>	<i>Phone, Data and Media Unification</i>
<i>CCTV</i>	<i>Intercom Systems</i>
<i>Nurse Call Systems</i>	<i>Network Backbone</i>
<i>Uninterrupted Power Source (UPS) Services</i>	<i>Generator Services</i>

Protection

From National Security to commercial and multi-family custom designs, we provide our clients with engineers, electricians and security specialists who have proven experience in information security engineering services based upon DCID 6/3 and defense in-depth strategies for protecting assets. We also perform the security processes required for certification and accreditation of sensitive systems to include the development of a computer security plan, performing risk assessments, security testing and evaluation, and developing the accompanying documentation (e.g., security features user's guide, trusted facility manual, etc.)
